

AGGREGATE PRODUCERS of WISCONSIN

QUARTERLY NEWS

December 2020

Producers of Crushed Stone, Sand and Gravel

President's Message

When I was asked to write a message for the newsletter, I wanted to write my entire message about COVID and the national election because I just don't feel like we have heard enough about either topic. Then I came to my senses. So, what else is there to talk about in 2020?

To be honest, something I have been thinking a lot about lately is the phenomenal support of our association. I am humbled by the unwavering support of our members, both our producer members and associate members – especially during this wild year. We have been working so hard to get our industry to have some regulatory certainty, and trust me when I say to you, that at times we do not feel like anyone is listening. Especially when it comes to voting for our interests. We are told one thing and then another veto is cast. Knowing how frustrated we get as a board, I am certain that many of you are wondering if we will ever get anything done. We hear you and thank you for your continued support. We are looking at ways to get in front of lawmakers and NOT let COVID be another excuse for not hearing us meeting with us or finally voting for us. We have definitely made some friends in the capitol and we will continue to do so. Quarry tours are still being held and we are constantly educating politicians on our issues.

We had a great shooting event at Milford Hills that exceeded our expectations after date changes, rainy weather, competing with golf outings, and not knowing what to expect. We raised almost \$7,000 for our Political Action Committee (PAC) and we were also honored to have Senator Roger Roth (R – Appleton) speak to us in person. These types of relationships will undoubtedly help us in the future and represent real progress in getting our concerns acknowledged.

For obvious reasons we are unable to host our annual convention but we are excited to host some interactive online sessions instead. Our hope is to keep membership engaged, give producers an opportunity to speak directly with DOT, DNR, and recognize our associate members who have shown their support in sponsoring this event.

APW Virtual Regulatory Conference 19

PAC Drive Contribution Form 22

Continued on page 2

With all of the continued support, we are able to keep the wheels turning, make progress with our agenda and stay engaged at the regulatory levels. It is thanks to the strong support of all of our members and the generosity of our sponsors that we are able to continue to keep this organization running well and moving forward through a year that none of us could have predicted.

Thank you all and stay well.

Renee Burcalow
APW President

Executive Director's Message

As we reach the end of 2020 (thank God), I wanted to give a special thank you to our dedicated board members who have served APW well during these unprecedented times. It would not be an exaggeration to say that this year was full of unanticipated conundrums that required hard decisions by our board. Rescheduling and canceling of events, loss of revenues because of our calendar changes, and continued financial obligations required a lot of discussion and thought. Some decisions were not easy – I personally would have been happier having an in-person convention this year, but circumstances dictated a virtual one instead. I'm hoping 2021 presents a much different landscape.

I would also be remiss if I didn't thank our associate members who have given extra financial support to APW this year. The dedication and support these companies give is what makes APW as successful as it is. These companies are detailed throughout this newsletter in recognition of their contributions. Please be sure to thank them and recognize why working with these companies not only helps your business, but also helps APW and our industry.

While our in-person convention will not occur this year, please attend our Virtual Regulatory Conference on Thursday, December 3. WisDOT will be presenting on all of the changes to

the QMP Specification for aggregates (9:00 AM), the WI DNR will be providing an update on the reclamation program (10:00 AM), and our lobby team will be discussing the 2020 election results and how they will affect the 2021-2022 legislative session (11:00 AM). APW's annual meeting will happen at noon. This event is free to our members and you can register to attend by going to: [APW Virtual Conference Registration](#).

Thank you for showing your support by being a member of APW. I understand there are many decisions that you make every day in your business that affects how your money is spent. I appreciate that you have decided to support our industry and our organization through your dues every year. Our efforts as an organization help ensure that we as aggregate producers can stay in operation and safeguard our futures in this industry for many years to come.

Enjoy the holidays and stay well!

Erin Longmire
APW Executive Director

November Elections Bring Continued Republican Control in Legislature

In the November 3 elections, Democrats prevented Republicans from reaching two-thirds majorities in either house of the Legislature, but they fell short of big gains in the Assembly.

Republicans picked up two seats in the Senate, while Democrats only knocked off two Assembly GOP incumbents despite significant spending advantages in their favor.

Former DATCP Secretary Brad Pfaff (Democrat) edged former GOP state Sen. Dan Kapanke in the open 32nd SD in the La Crosse area. And in the open Green Bay-area seat represented by the retiring Sen. Dave Hansen (D-Green Bay), Republican attorney Eric Wimberger beat De Pere Ald. Jonathon Hansen (Democrat). Republican Rep. Rob Stafsholt (R-New Richmond)

also defeated incumbent Sen. Patty Schachtner (D-Somerset) in the 10th SD in northwest Wisconsin.

These wins put Republicans at a 21-12 majority in the Senate, the largest majority for either caucus since the 1970s.

Republicans will also hold a 61-38 majority in the Assembly after losing just two seats. Both Democrat pickups in the Assembly were suburban Milwaukee seats.

In the 13th AD, Democrat Sara Rodriguez defeated Rep. Rob Hutton (R-Brookfield) 51% to 49%. And in the 23rd AD, Democrat Deb Andraca defeated Rep. Jim Ott (R-Mequon) 52% to 48%.

Legislative Leadership and Joint Finance Committee Chairs Announced

Sen. Devin LeMahieu (R-Oostburg) was elected as Senate Majority Leader for the upcoming legislative session. LeMahieu replaces Sen. Scott Fitzgerald (R-Juneau) who successfully ran for Congress to replace retiring Representative Jim Sensenbrenner.

Rep. Robin Vos (R-Rochester) was also re-elected as Speaker of the Assembly. Vos has been Speaker of the Assembly since 2013.

Sen. Janet Bewley (D-Mason) was re-elected as Minority Leader of the Senate and Rep. Gordon Hintz (D-Oshkosh) was re-elected as Minority Leader of the Assembly.

Legislative leadership has also announced the co-chairs of the Joint Committee on Finance (state budget committee or JFC) for the 2021–2022 legislative session. Rep. John Nygren

(R-Marinette) will continue as the co-chair for the State Assembly. It will be Nygren’s fifth term leading the committee. Sen. Howard Marklein (R-Spring Green) will be the Senate co-chair for the committee. While it is Marklein’s first time chairing the committee, he has served as a member of the Joint Finance Committee since 2014. Marklein will replace Sen. Alberta Darling (R-River Hills) as co-chair.

APW is happy to report that the members of legislative leadership and both co-chairs of the JFC have all met with members or toured their pits/quarries and are aware of our issues.

APW Continues to Educate Lawmakers Across Wisconsin

Over the last several months, APW has continued to educate lawmakers across the state about the aggregate industry and the issues that impact it. One of the most impactful ways we can educate lawmakers is by actually **showing them** what we do through tours of pits and quarries. So far this year, we have brought the following lawmakers into pits/quarries:

*Milestone Materials – La Crosse
Brad Pfaff – (Senator-Elect – D-La Crosse)
Rep. Steve Doyle – (D-Onalaska)*

*Milestone Materials – La Crosse
Dan Kapanke – (Senate
Candidate) – R-La Crosse*

*Milestone Materials – Bayfield
Sen. Janet Bewley – (D-Mason)
Rep. Beth Myers – (D-Bayfield)*

Build Back Better: What Biden's Presidency Could Mean for the Mining Industry

Matthew Hall
November 12, 2020

While the incumbent Donald Trump has yet to formally concede the result, and will remain in the White House until President-elect Biden's inauguration in January 2021, Biden's victory – called four days after election day – brought an end to uncertainty over the race's outcome and global markets rallied in response to the former Vice President's win.

President Trump has repeatedly contested the results of the election, alleging mass voter fraud orchestrated by his opponents – but neither Trump nor his team have provided any evidence to support these claims.

A pillar of Donald Trump's campaign in 2016 was his pledge to reinvigorate US industry, including mining, and particularly the coal sector. While his administration removed red tape and rolled back Obama-era regulations that slowed down processes, results for the coal sector have been mixed at best, with jobs continuing to fall even before the COVID-19 pandemic.

Biden, meanwhile, was elected on a slate of proactive climate policies that could mark a major shift in the US away from fossil fuels and towards renewable energy.

National Mining Association: "Now is the time to move forward"

National Mining Association (NMA) President and CEO Rich Nolan congratulated President-elect Biden and Vice President-elect Kamala Harris following their victory: "The mining industry looks forward to working with President-elect Biden and Vice President-elect Harris to help drive America's post-pandemic economic recovery and set our country on a firm course for a prosperous future."

"Working together we can increase the competitiveness of existing industries and re-establish and strengthen our domestic supply chains," Nolan said. "We can reduce our reliance on foreign countries for minerals that we can mine and use here at home, all while creating more jobs.

"We can produce reliable affordable energy for all, while leading the world in the development and deployment of emissions reducing technologies for the fuels that will continue to underpin the world's energy needs. Working together, we look forward to the opportunity and embrace the challenge."

GlobalData: "Biden would be expected to phase out taxpayer subsidies for fossil fuel companies"

"Where the sector would suffer versus under Mr. Trump would be coal, where Mr. Biden would be expected to phase out taxpayer subsidies for fossil fuel companies, although he has been keen to assure voters he has no plans to eliminate the industry all together," said David Kurtz, senior mining analyst at GlobalData, on the prospect of a Biden victory in the election. "His official climate plan sets a deadline of 2050 for the country to reach net-zero emissions, and the policies include ending fossil fuel subsidies and blocking new oil and gas leases on public lands and investing in clean energy, amongst others.

"Additionally, approval time would be expected to be longer and there would be greater chance of projects being rejected due to their impact on the environment," Kurtz added, with Northern Dynasty Minerals' Pebble project in Alaska potentially not being approved by the Biden administration.

Kurtz said that battery metals could get a boost in the next four years, as Biden seeks to gradually transition from fossil fuels to

Continued on page 5

National Industry News

Build Back Better (continued from page 3)

renewable energy, and the President-elect pledged to invest \$2 trillion in electric vehicle infrastructure and green projects:

“This will have a very positive impact on commodities used in EVs such as lithium, copper, nickel and cobalt, as well as those important for solar panels and renewable energy infrastructure.”

NRDC Action Fund: “The people have spoken and it’s time for change!”

The NRDC Action Fund, affiliated but separate to the Natural Resources Defense Council, welcomed Joe Biden’s victory. The NRDC had previously been working to support a free and fair election and ensure every vote is counted, in spite of President Trump’s claims that some votes had been cast illegally.

“Joe Biden’s climate plan is the strongest we have ever seen from any president before him,” said Gina McCarthy, President and CEO of the NRDC Action Fund. “Not only that – but the country elected Kamala Harris, the first female vice president of color in our nation’s history! And she is just the partner we need with us in this fight – sharing her deep understanding of the climate crisis.

“Now it’s time to turn promises into progress, with policy solutions and sound investments that cut climate pollution, create millions of good-paying jobs, protect the health of our people, and advance justice and equity for us all.”

Lomiko Metals: “encouraged by President-elect Biden’s \$400 billion clean energy plan”

Canada-based flake graphite company Lomiko Metals said it was “encouraged” by President-elect Biden’s plan for clean energy. The incoming administration will set a firm target of 2050 to reach net zero emissions.

Biden has vowed to make a historic investment in clean energy and innovation, putting \$400 billion over 10 years into clean energy and job creation in the sector. As reported by *Reuters* in October, Biden’s campaign privately told miners it would support the domestic production of battery metals for electric vehicles.

Lomiko said that demand for graphite – used in the batteries of electric vehicles – is expected to increase exponentially, and following the company’s completion of a \$750,000 financing in October, Lomiko could be placed to get a foothold in the domestic graphite sector.

These four years of a Biden presidency could be a boon to the litany of emerging battery metals companies in North America, with the Democrat’s victory already seen as a positive for getting more electric vehicles on American roads.

Ai Group: “two fundamental markers for Australian industry”

“The election of a Biden administration will have two fundamental markers for Australian industry,” Innes Willox, chief executive of Australian national employer association Ai Group said.

“The incoming administration will through commentary, executive order and potentially legislation place a far greater emphasis on climate change and energy policy. The commitment to net zero emissions by 2050 will encourage other economies to move down this path.”

Net zero commitments have already been made by the European Union, China, Japan, and South Korea. With the US set to implement a firm 2050 net zero target under Biden, the majority of Australia’s export markets for fossil fuels will be targeting net zero by around 2050. Willox said that the US committing to a net zero target will encourage more countries to follow suit.

The other shift, according to Willox, will depend on US-China relations under Biden: “The risk for Australia until now has been that we have been caught up as collateral damage in the US-China trade dispute. The future risk is that China may seek to substitute Australian exports in key sectors with goods from the US in an effort to reset their economic relationship.

“Australia has maintained a strong, diverse and cooperative bilateral economic relationship with the US for generations. There is no reason to think this will change with the change in the White House,” Willox added.

Eurasian Resources Group: “Miners can supply the critical raw materials required to support core parts of the country’s environmental program”

Benedikt Sobotka, CEO of Eurasian Resources Group and co-chair of Global Battery Alliance said: “We hope that the earlier announced economic plans for green, renewable energy would be on the new administration’s priority list. Miners can supply the critical raw materials required to support core parts of the country’s environmental programme.

“We expect the upcoming green stimulus to strengthen the renewable energy and electric vehicle sectors in the US, which will fuel demand for key battery metals, including cobalt. Additional positive impacts might result from federal vehicle purchasing schemes, including investment in replacing internal combustion engine vehicles with battery powered vehicles.

“We also hope that an ambitious green investment plan, which targets copper-reliant sectors including sustainable infrastructure, 5G and clean energy, announced recently, is not delayed. Of particular note is the administration’s vision of building a ‘green’ power grid, which is set to include 500,000 EV charging outlets.”

National Industry News

NSSGA Urges Support for Builder Act

September 22, 2020

ALEXANDRIA, VA –The National Stone, Sand & Gravel Association’s Vice President of Government and Regulatory Affairs Michele Stanley today issued the below statement commending Rep. Graves (LA) who introduced the Building U.S. Infrastructure through Limited Delays & Efficient Reviews (BUILDER) Act this week.

“NSSGA applauds Rep. Garrett Graves (LA) for introducing the Building U.S. Infrastructure through Limited Delays & Efficient Reviews (BUILDER) Act, which will bring key reforms and clarity to the National Environmental Policy Act (NEPA) process – while still maintaining strong environmental protections. The BUILDER Act is critical for our economic recovery, as it enhances recent Administration action to remove pointless red tape. It will allow taxpayer dollars to be used to develop much-needed infrastructure that sustains high-paying jobs, improves our communities, and advances environmental stewardship.

“During the 40 years since an update to the regulations have occurred, the process has created duplicative agency actions resulting in year-long delays in the permitting of infrastructure projects. We have witnessed hundreds of public works projects, which are important to the livelihoods of all Americans, be halted and delayed by unnecessary lawsuits and bureaucratic setbacks that do nothing to advance the underlying goals of NEPA. These setbacks are harming our economic potential needed to help our nation recover. This legislation will unleash our potential by allowing investments in renewable energy, clean drinking water, affordable housing, efficient transit, and projects that reduce congestion and delays to finally move ahead.

NSSGA members thank Rep. Garrett Graves (LA) for his work and urges Congress to advance this legislation.”

Need screens? We have got you covered.

Unified manufactures and maintains the largest inventories of woven wire, rubber and polyurethane screening media.

- Square, Slotted, and Clean Screens
- Urethane Tension Mats and Urethane/Rubber Modular Systems
- Our patented Tufflex™ Wire
- SuperFlow Self-Cleaning Media
- Punch Plate
- Channel Rubber and Rails
- Installation and Replacement Components

Looking for wear parts? We stock it.

Unified stocks the largest inventory of:

- Jaws, Mantles, Bowl Liners, Concaves and Gyratorys
- VSI/HSI Parts including Shoe, Anvils, Blow Bars and more

Want to be able to pull everything from the same pallet?

- Clamp Rails
- Installation Hardware
- Channel Rubber

14 locations across the country makes it possible to provide 24-hour delivery of products on our stock list and fast delivery on custom orders.

DOT Updated COVID-19 Guidance – HTCP Impacts

The Aggregate Producers of Wisconsin (APW) was notified that the Department of Transportation has suspended all face-to-face meetings and instruction due to the increased COVID-19 numbers. This suspension will affect the Highway Technician Certification Program (HTCP). The DOT has paused all HTCP training for the remainder of 2020 and is working to develop a potential virtual training program for the winter/spring months of 2021.

DATES TO REMEMBER

APW Virtual Regulatory Conference Thursday, December 3, 2020

Registration is now open for the Aggregate Producers of Wisconsin's Virtual Regulatory Conference on Thursday, December 3. The agenda is as follows:

WisDOT Update on Aggregate QMP Specification

9:00–10:00 a.m.

Representatives from Wisconsin's Department of Transportation will discuss changes to the Quality Management Program for Aggregates for 2021. Information relating specifically to the latest freeze/thaw testing methodology will be shared with time dedicated for questions and answers.

DNR Update on Wisconsin's Reclamation Program

10:00–11:00 a.m.

Wisconsin's Department of Natural Resources Non-Metallic Mine Coordinator will provide an update on the reclamation code and discuss any issues affecting non-metallic mines in the state. This presentation will also allow for time dedicated for questions and answers.

Legislative Update

11:00 a.m.–12:00 p.m.

Hear from APW's lobby team about the 2019–2020 legislative session, 2020 election results, what to expect in the 2021–2022 legislative session and how that will affect our industry.

APW Annual Meeting

12:00–12:30 p.m.

Receive all of the latest news about the happenings of APW. Committee reports, membership status, board election results, and a financial review are just some of the many things that will be discussed during the annual meeting.

To register for any or all of the sessions, please click here. This conference is free to our membership thanks to our generous sponsors.

Revisions for the 2021 Standard Specifications for Highway and Structure Construction

WisDOT will be presenting at our Virtual Regulatory Conference on Thursday, December 3 at 9:00 a.m. on the following revisions to the 2021 Quality Management Program Specification book. To register to attend this seminar, please [click here](#).

- Revised 106.3.4.2.2.2 to update Freeze-Thaw Soundness testing procedure as modified in CMM 860.2 ASP 6 Dec 2019 let.
- Revised 301.2.3(1) to update Freeze-Thaw Soundness testing procedure as modified in CMM 860.2 ASP 6 Dec 2019 let.
- Revised 301.2.4.5 to update Freeze-Thaw Soundness testing procedure as modified in CMM 860.2 ASP 6 Dec 2019 let. Also requires Freeze-Thaw testing for reprocessed material from outside the project limits.
- Revised 450.2.2(1) to update Freeze-Thaw Soundness testing procedure as modified in CMM 860.2 ASP 6 Dec 2019 let.
- Revised 501.2.5.5(1) to update Freeze-Thaw Soundness testing procedure as modified in CMM 860.2 ASP 6 Dec 2019 let.
- Revise 730.1.2.3(1) to require electronic submittals for gradation, fracture, liquid limit, and plasticity.
- Revise 730.3.1(3) to increase time allowed for stockpile tests. ASP 6 Dec 2019 let.
- Revise 730.3.2(3) to allow partial lots to be included with previous lot for partial lot quantities of 750 tons or less.
- Revise 730.3.2(4) to increase time allowed for reporting recycled asphalt test results. ASP 6 Dec 2019 let.
- Revise 730.4 to add test requirements for small quantity contracts <= 500 tons. ASP 6 Dec 2019 let.

STSP Updates

- Revised 370-010 C.2.5.1 Contractor Required Quality Control (QC) Testing – changed lot width from equal width to 18 foot maximum and 6 foot minimum.

ASP 6 Updates

- 710.2 Small Quantities – Concrete aggregate testing for small quantities
- 710.5.6 Aggregate Testing – No longer allows aggregate acceptance with production records except for small quantities. Defines small quantities.

Proposed revisions for 2022 spec book

- Revise 106.3.4.2.2 Department - Approved Aggregate Sources added for fine aggregate
- Revise 106.3.4.2.2.3 Quality Assurance to add tolerance for lightweight pieces test.
- Revise 501.2.5.3 Fine Aggregates – requires approved source

Focusing Your Political Resources

Aggregate Producers of Wisconsin Political Action Committee (APW PAC)

What is the Aggregate Producers of Wisconsin PAC? (APW PAC)

- ◆ A Political Action Committee (PAC) is a group formed (usually by an industry or an issue-oriented organization) to raise and contribute money to the campaigns of candidates likely to advance the group's interests.
- ◆ APW PAC is dedicated to advancing the issues important to the aggregate industry in Wisconsin. The APW PAC will pool money from owners, employees and partners to make contributions to candidates for elected office.
- ◆ Contributions to the PAC must come from individuals; corporate contributions to the PAC are prohibited.

Protecting Your Industry

- ◆ APW reviews all legislative initiatives affecting your right and ability to conduct your business in Wisconsin.
- ◆ APW supplies you with all the information you need to understand how legislation will affect your business.
- ◆ Contributions are made to state elected officials of any party that supports APW's political initiatives.
- ◆ The APW and APW PAC are not aligned with any political party. We support those who are helpful to our industry.

Questions & Answers

- ◆ Can I make a personal or business contribution? **A:** The APW PAC can only accept and disperse personal contributions.
- ◆ Why should I contribute to the APW PAC? **A:** Laws that negatively affect aggregate producers can be made at anytime. To protect your future, we need legislators in office who support our industry.
- ◆ Why should my contributions go through the APW PAC? Why not give directly to the candidate? **A:** It is more effective to give through the APW PAC. Through the APW PAC the aggregate industry receives credit for the contribution as well as the individual. A contribution through the APW PAC identifies both you and APW to candidates.
